Not illustrated. 1905-01-01 Excerpt: . . . to the lower slope of Dam No. 4, in 1903, my attention was called by Mr. W. S. Overstreet, in charge of the repair work, to some pieces of oak showing attacks from hellgrammite, but these were not marked, and I paid very little attention to the matter. It is probable that if the upper slope of this dam was exposed the effect of the attack of this insect would be much more apparent. I believe that the loose condition of the backing at these two dams gives conditions particularly favorable for the hellgrammite and accounts for the fact that they do not seem to have done much damage to other dams on Green River. amount of surface covered was insufficient to stop all leaks, and further work remains to be done. 5. The following quotations from Leland O. Howards Insect Book give a brief description...
