Brand New Book ***** Print on Demand *****.Excerpt from The Influence of Group Longevity on Project Member Responses to Their Work Settings Research has shown that project groups characterized by relatively stable memberships were significantly lower in performance than other project teams. Despite these studies, we have not as yet learned how high performing stable project teams (assuming there are a few) maintain effectiveness over time. The present study, as a result, focuses on whether any project teams have successfully remained high performing with increasingly high levels of group longevity. Furthermore, are certain managerial behaviors particularly important in keeping a stable group creative and high performing? Both of these issues are addressed using data collected from 71 RD project groups from ten different technology organizations.
