

Atomic and Molecular Electronic Configuration Revisited

Filesize: 5.87 MB

Reviews

Thorough information! Its this sort of good read. It is actually written in straightforward words rather than confusing. I am just delighted to let you know that this is basically the best book we have read within my personal existence and can be the greatest pdf for actually.

ATOMIC AND MOLECULAR ELECTRONIC CONFIGURATION REVISITED

[DOWNLOAD](#)

Createspace, United States, 2014. Paperback. Book Condition: New. 279 x 216 mm. Language: English . Brand New Book ***** Print on Demand *****.In AMEC, chapter one, you will find a structure for O₂ supported by both bond order and unpaired electron data. Previous attempts at providing an electronic structure for O₂ fails due to bond order, number of unpaired electrons, or oxygen atoms indicating five orbitals although four is the limit. Herein, you will find the newly described LONE P ORBITAL Pi BOND which is the solution not only for O₂ but also for NO and OF (uncharacterized?). The LPOP bond system is possible due to the small size and high electronegative character of the N, O and F atoms, which makes it related to H-Bonding. Diatomic structures involving row two periodic table elements (LiBe, Be₂, BeB, B₂, BC, C₂, CN, N₂, and F₂) are also presented. All structures are shown being formed by two methods: MRAE (Most Recently Added Electron) and LCAO (Linear Combination of Atomic Orbitals). Chapter one also includes a (Section III) MRAE Mechanistic Sequence For: NO⁺ > NO > O₂ > OF > F₂ (and F₂ > F⁻ + F⁰), (Section IV) Photographs of NO and O₂ molecular models, (Section V) MRAE-MO Energy Level diagrams for the diatomic structures listed above, and (Section VI) a MRAE-MO Energy-Level Diagrams Template, which is based on the cascade of changes in electronic distribution when an electron is forced onto a previous structure (MRAE), such as N₂ going to N₂⁻ and NO⁺ going to NO. Chapter 2 includes sections on hybridization and mechanism as it relates to polyatomic species. The following sequences are given: C + H > CH + H > CH₂ + H > CH₃ + H > CH₄ (saturated and tetrahedral arrangement) and N + H...
