Summary: "Deterrence or the threat of sanctions for violation of rules is a complex concept but an inherent part of any crime-control strategy. David Kennedy has thought long and hard about the complexities and has worked directly with law enforcement and communities in developing innovative deterrent strategies and tactics. In this wide-ranging exploration of the many facets of deterrence, Kennedy draws heavily on his involvement with real-world crime prevention to develop new frameworks to make sure that deterrent threats are framed to do the job." Alfred Blumstein, Heinz School, Carnegie Mellon University "David Kennedy demonstrates an encyclopedic command of the deterrence literature. More important is his balanced and insightful analysis of the promise and limits of deterrence for preventing crime. This book is a must read for students of deterrence and practitioners who can affect the way the punitive powers of the police, courts, and corrections are used to prevent crime." Daniel S. Nagin, Teresa and H. John Heinz III University Professor of Public Policy and Statistics, Carnegie Mellon University "By the thoughtful application of focused deterrence strategies our community has become a safer place...."
