Reviews

It is one of the best publications. It is definitely simplistic but excitement in the 50 % in the ebook. I am very happy to let you know that this is basically the greatest publication I have got to go through within my own existence and could be the greatest pdf for ever.

Not illustrated. 1892 Excerpt: .made upon each plate--a practice which seems open to serious objection, though it of course lessened the cost of the survey. Mrs. Fleming superintended the measurement of the plates and the preparation of the catalogue, being assisted throughout by a staff of ladies. The volume contains five tables, of which the first is the actual Draper Catalogue. This contains the reference number of each star, its number in the Durchmusterung and in the Harvard Photometry, its place for 1900, and the number of photographs obtained of it. Then follow the type of the spectrum and its photographic magnitude, and a table of the differences between this last value and the Bonn, Argentine, and Harvard magnitudes respectively. The types of spectra upon which the classification is based are not precisely those of Secchi, or of any other previous grouping, since certain grades of difference were readily recognised in the part of the spectrum most easily photographed--viz., the violet--which escaped notice in that part which is brightest to the eye. Instead, therefore, of Secchi's four types, no fewer than 16 classes are adopted, which are distinguished by letters of the alphabet. The classification is, in brief, as follows: --Classes A to D correspond to Secchi's type I. These show Dr. Huggins's hydrogen series of lines as their chief feature. When these lines and the K line alone are seen the star is of class A; if other lines are present, of class B. A doubling...
